

# Whirlybird Vent Installs

Our Contractor Davis Constructors & Engineers, Inc and Rain Proof Roofing will be installing whirlybird vents on the rear portion of the roof to provide additional attic ventilation.

This will begin on

and will last approximately 3 business days.  
All work will take place between 8 AM and 5 PM.

The Contractors will require full access to your roof and request that residents and pets keep out the backyards while work is taking place to ensure safety. Every effort will be made to minimize disruption; however, this project requires the use of nailers and hammers, so noise will be present.

For more information about this project, including more information about the scope of work, please visit [AuroraMilitaryHousing.com/Projects](https://AuroraMilitaryHousing.com/Projects)
